

Sydney Paranormal

Aidan Kirvan

Nick Hammond

Victor Zottmann

# Purpose

---

The objective of this web app is to provide a centralised depository of supernatural events around Sydney.

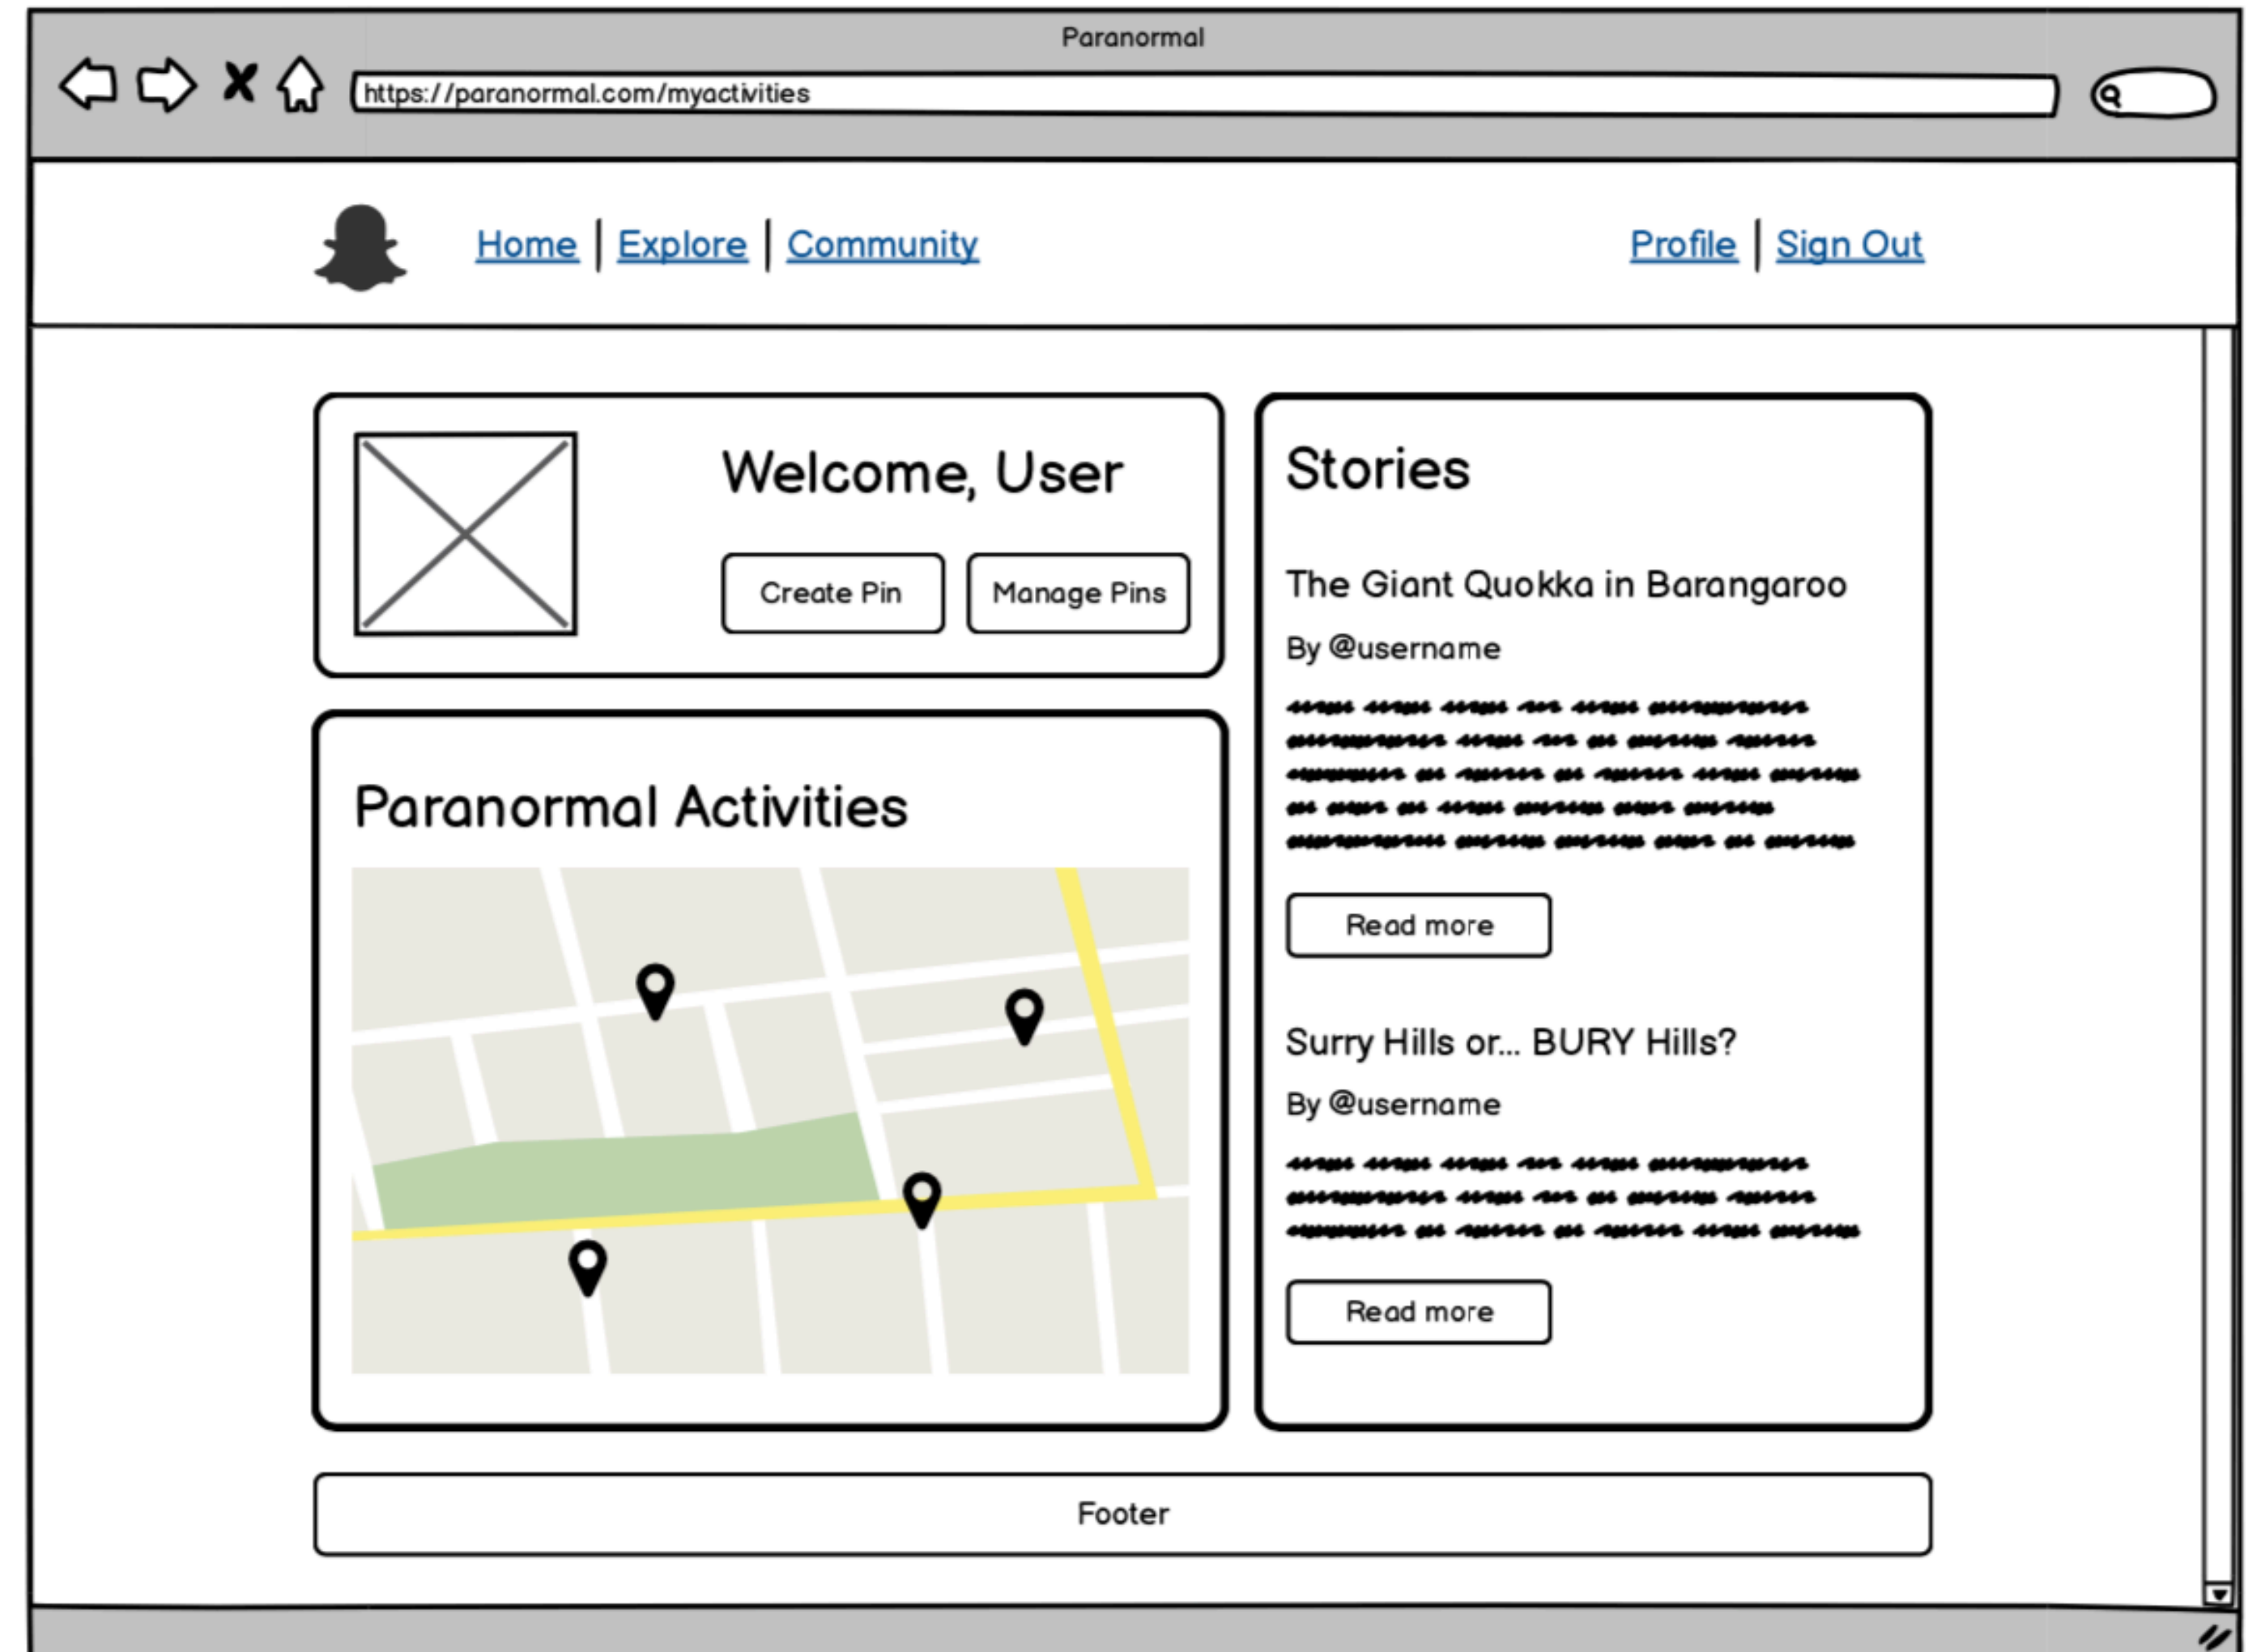

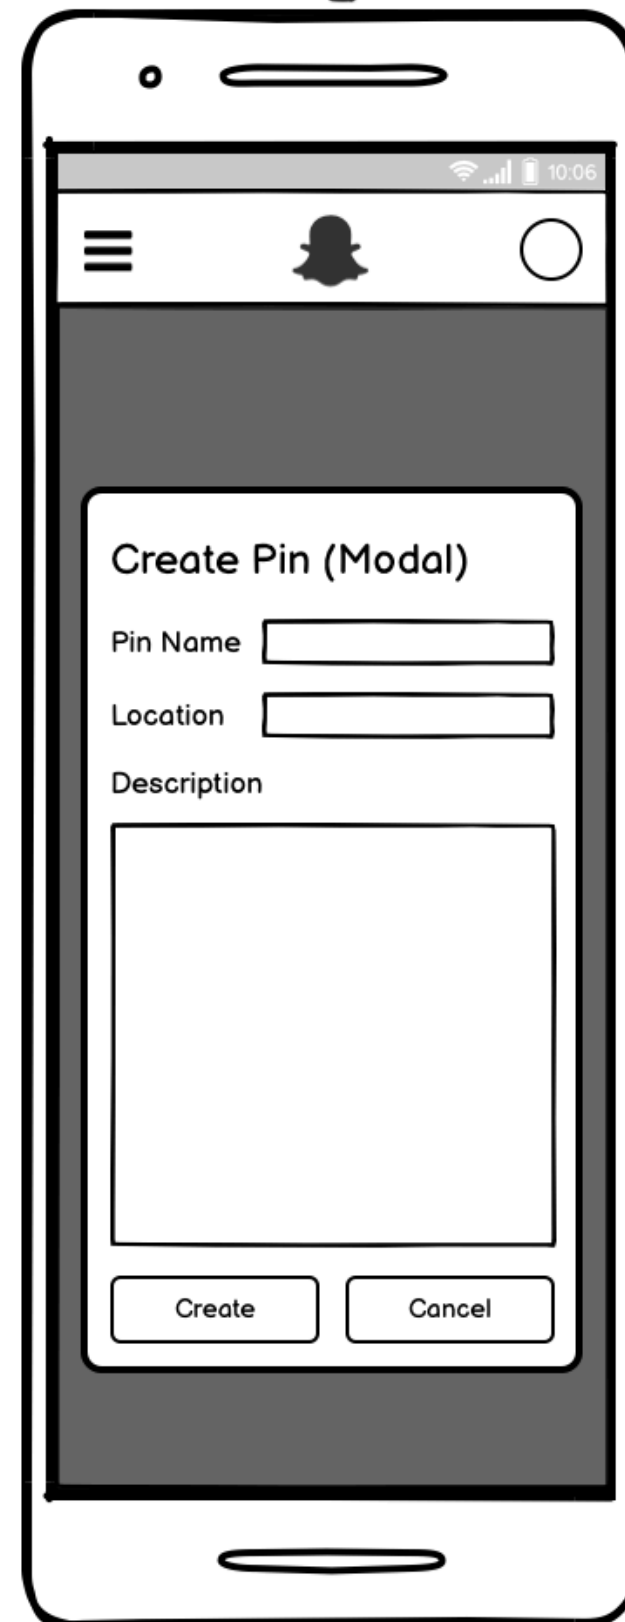

There is currently a limited ability for those who have witnessed strange event to share their story, and connect with others who might've experience something similar.

# Functionality / Features

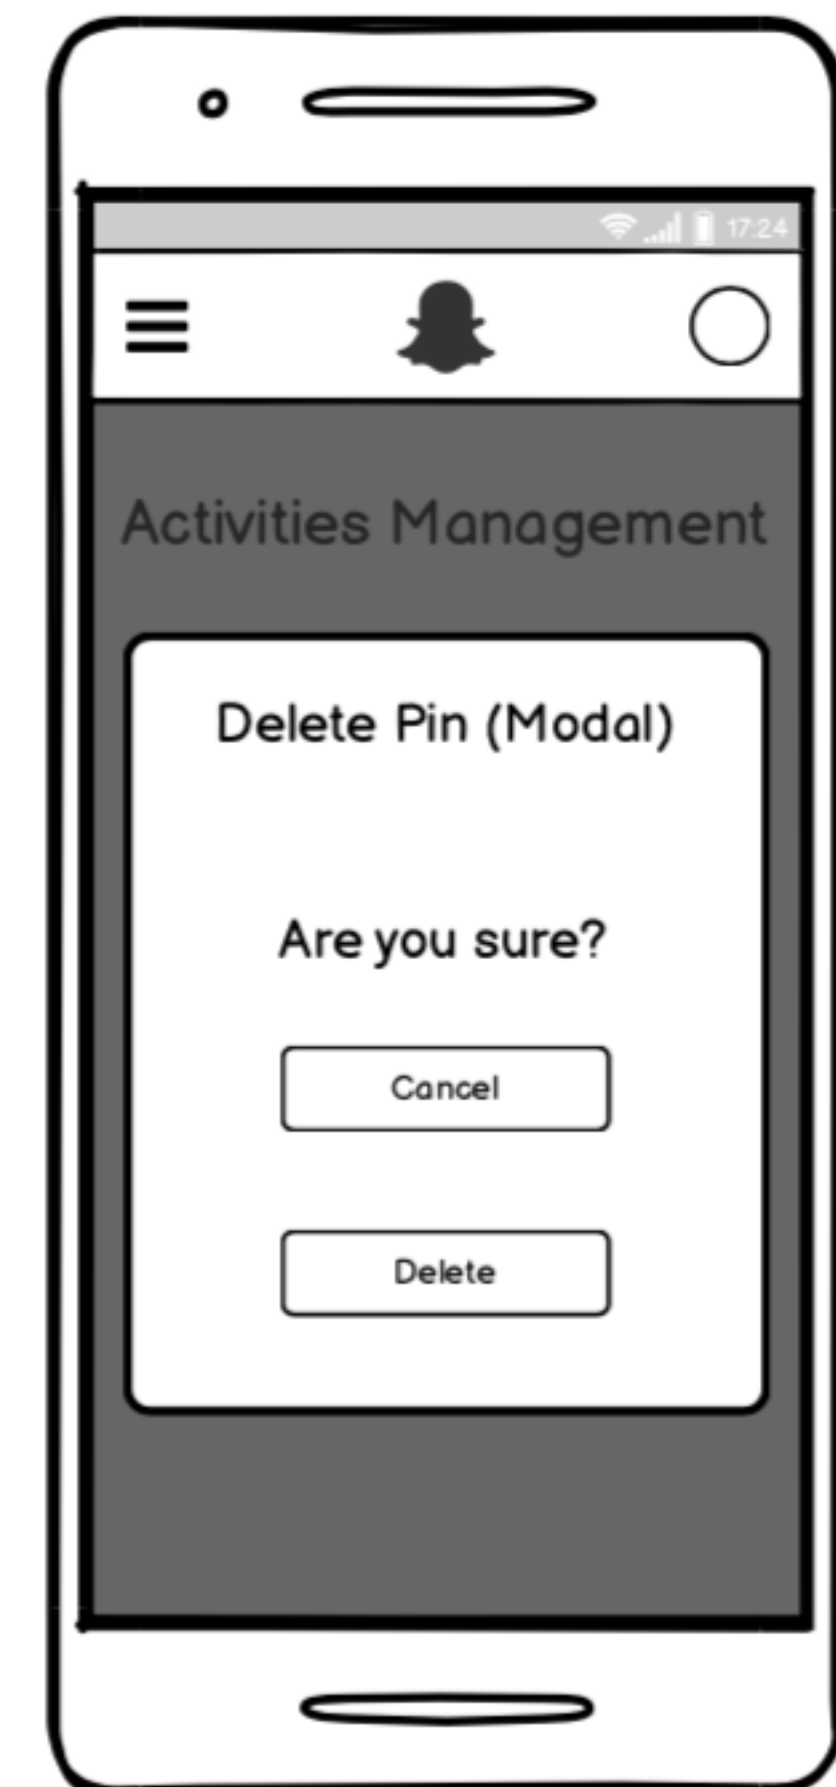

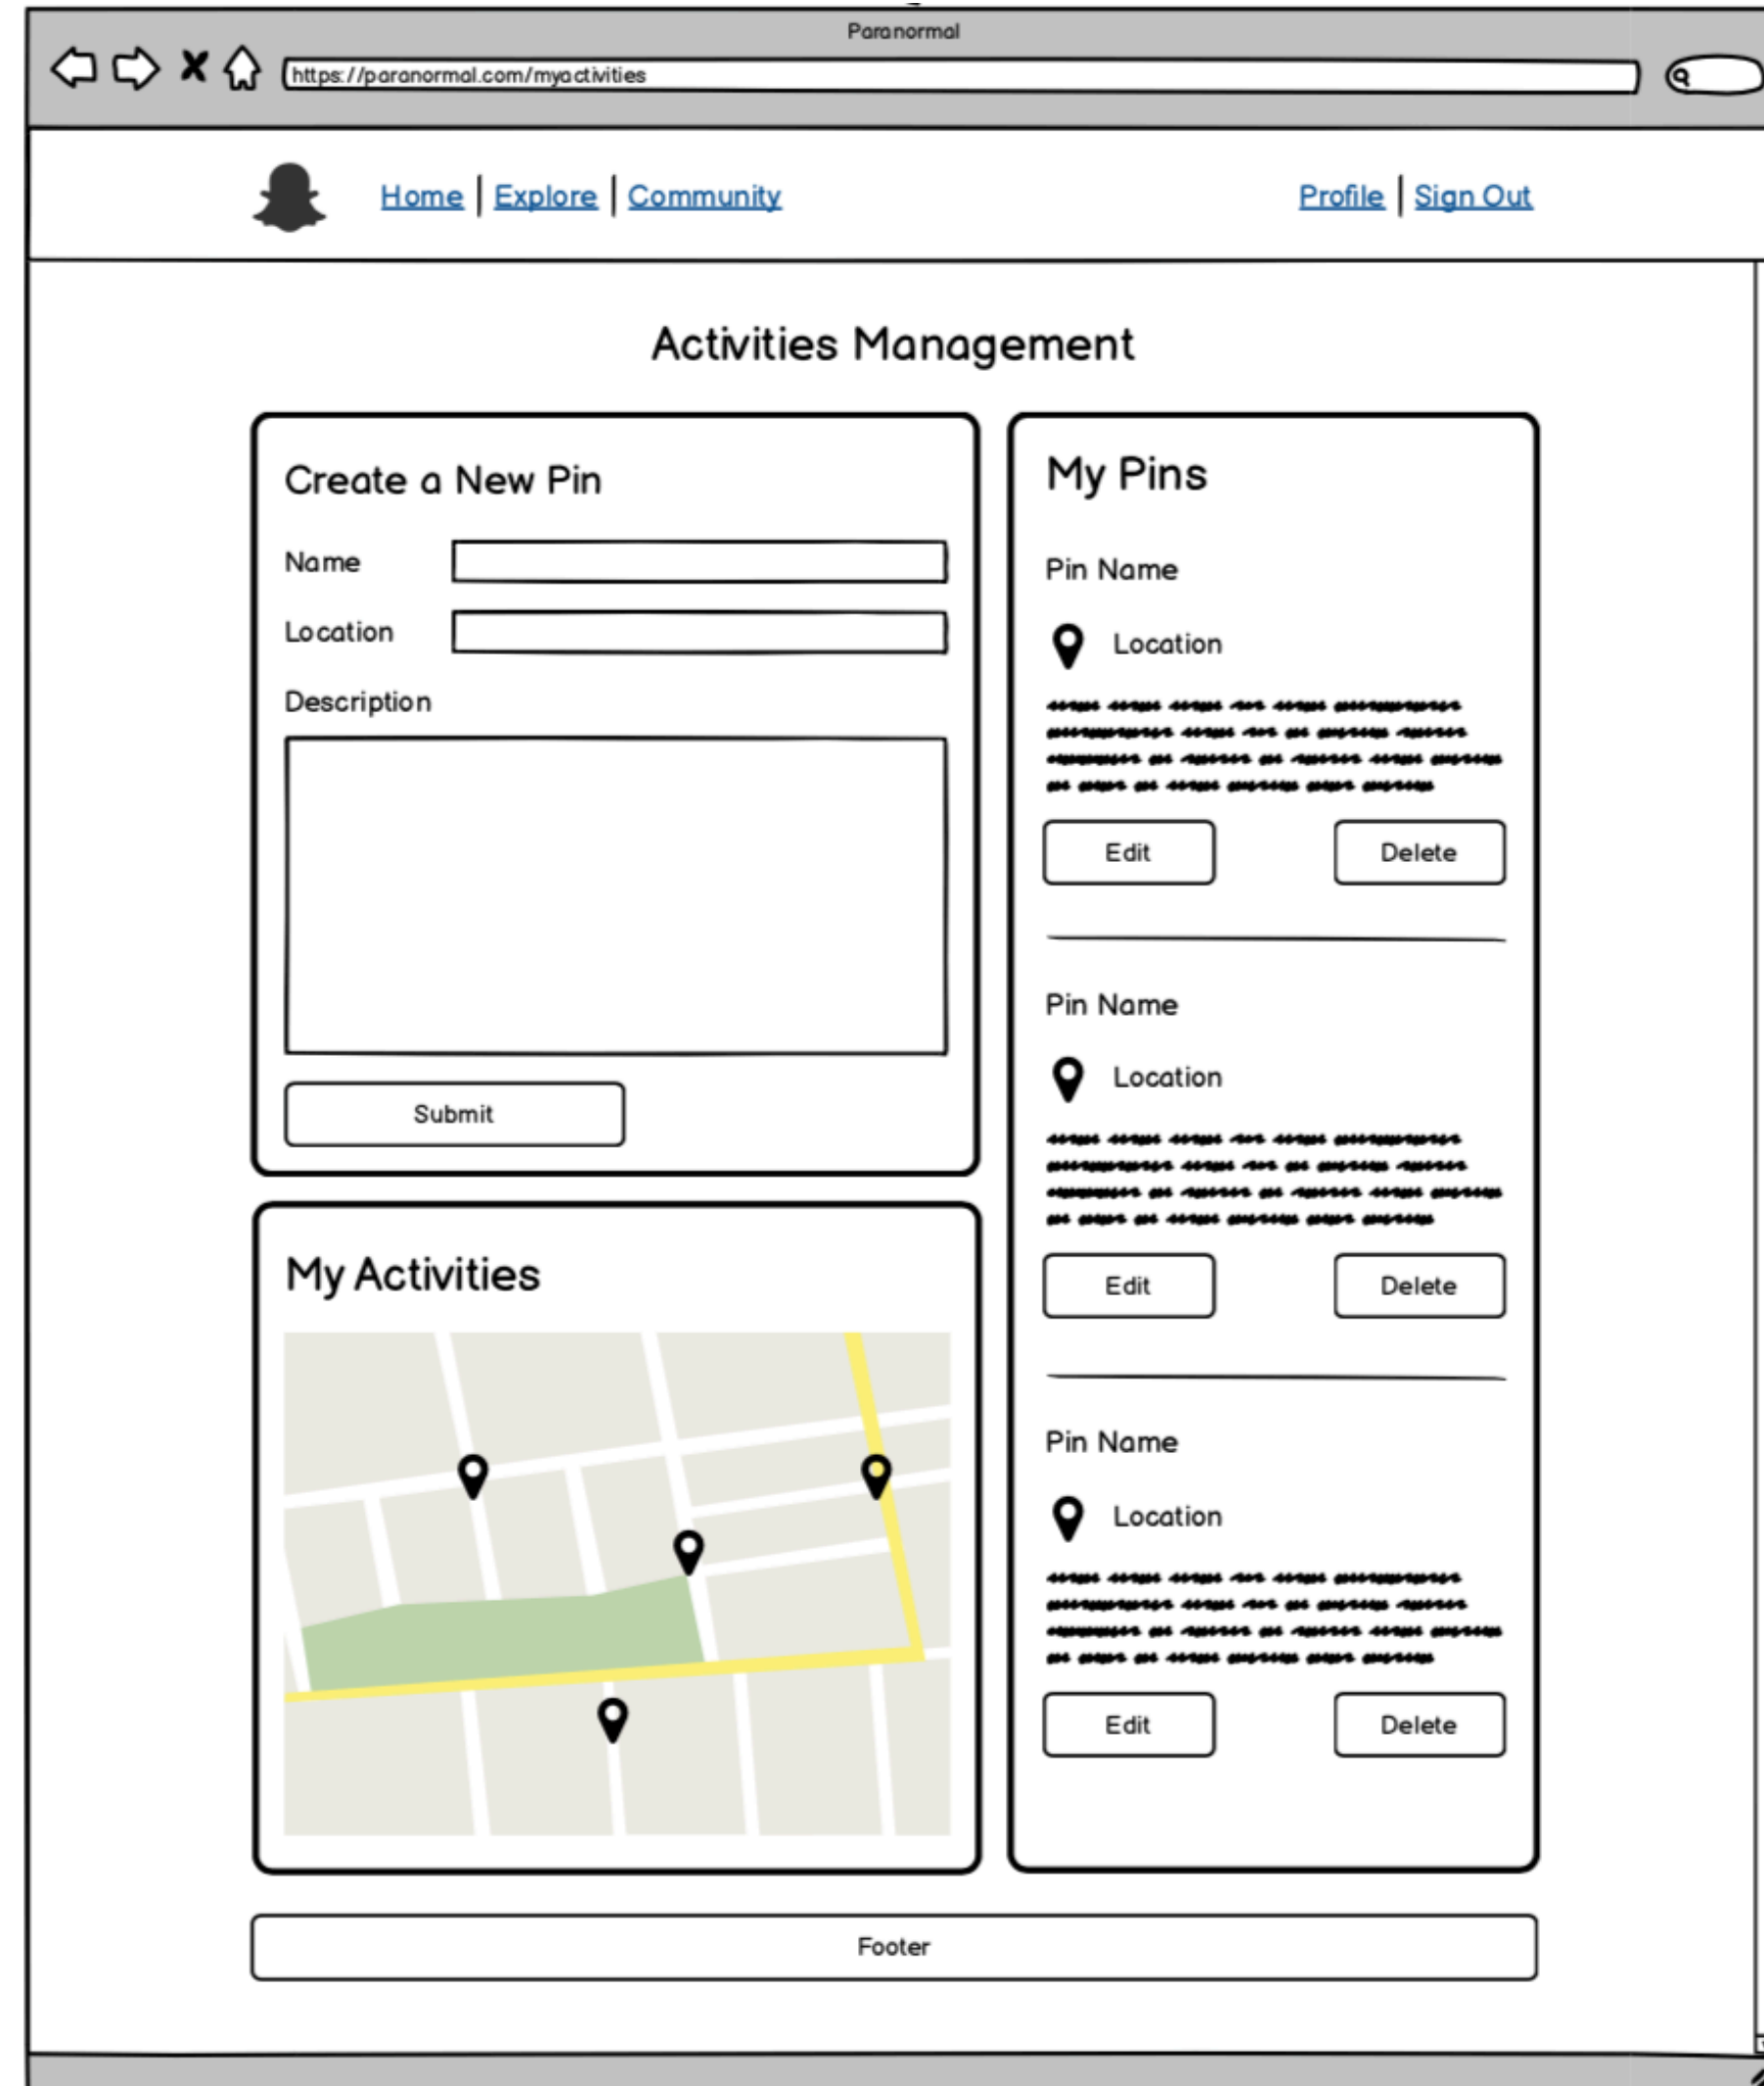

---

- The platform will consist of an interactive map where users can place a pin on a given location, which will represent a paranormal event.
- When pins are clicked, a modal window will display further details about the event at hand. If multiple events have been logged for the same pin, the window would display them in chronological order.
- Each logged event can would show any notes from users, as well as any pictures they my have taken. Users would also be able to comment on other users' pins.
